

# Fresh Docs

**Zia Consulting's** Fresh Docs mobile application allows users to access enterprise content management (ECM) systems from any iPhone, iPad or Android devices. With Fresh Docs users can browse, search, retrieve, open, edit and email documents from any ECM system on a mobile phone or tablet device. Fresh Docs makes content from their ECM accessible to mobile productivity applications, adding more business value to mobile devices. Fresh Docs is available FREE from the Apple iTunes Store or the Android Marketplace.

For organizations that want a branded Fresh Docs application or customized features, Zia offers branding, professional services, application integration, support and training.

## Version 1.5 enhancements:

- Better support for the different CMIS Producers
- View Properties
- Capture Photos & Upload Photos
- Enhanced handling of content being previewed
- Ability to add Alfresco comments (Alfresco Repositories only)
- Alfresco Tags (available only on Alfresco repositories)

## The Technology:

Fresh Docs leverages the Content Management Interoperability Services (CMIS) to communicate with leading ECM systems including Alfresco, IBM FileNet P8, Microsoft SharePoint, Nuxeo and OpenText. Fresh Docs works with any CMIS compliant content management repository by securely exposing the content with other CMIS compatible applications and authenticating the users and device.

Users can configure Fresh Docs to connect to a repository using wireless technology built into the device. The connection supplies an authenticated user to provide a custom view of the ECM system.

## Key Features:

- **iOS and Android** native applications for accessing ECM systems
- **Connect to any CMIS repository** supporting the CMIS AtomPub protocol binding
- **Authenticate to a ECM** repository
- **Browse an ECM** hierarchy using the authenticated access permissions
- **Access content** stored in the repository, including Microsoft Office and Adobe PDF documents
- **View content metadata** directly in the application
- **Search the ECM system** from a mobile device
- **Identify favorite content** for easy access later
- **Open content** in other applications to access robust productivity applications available on the mobile device
- **E-Mail content** using the device's native email support

## Professional Services Packages:

- Branded application with custom name, icon, graphics, colors, and about screen
- Internationalization of the text throughout the application
- Enterprise application deployments for in-house application delivery
- Deployment of customized applications to the Apple App Store or Android Marketplace
- Application customization to meet an organizations' business requirements
- Application support and training
- Integration with other business or mobile applications
