

## Enterprise Mobile Content Management

Mobile technology has transformed the way people work and interact with content. Workers have come to expect that business information and business processes will be available on their mobile device. The challenge is extending enterprise content out to mobile devices in a secure and managed manner. Often the mobile applications of large ECM systems are hard to navigate, search and use, resulting in more frustration than benefit.

This frustration is what led Zia Consulting to partner with WeWebU to co-develop MobileWorkdesk, a revolutionary new enterprise-ready mobile content management solution for the iPad and iPhone that connects with any CMIS-compliant ECM system. MobileWorkdesk bring true enterprise-class mobile content management with easy navigation and personalized content such as individual inboxes, tailored views, user-related favorites and stored searches. It is the first mobile solution designed to support large deployments of leading ECM systems such as IBM FileNet P8, IBM Content Manager 8 or Alfresco Enterprise with thousands of users and millions of documents.

### ZIA'S PROFESSIONAL SERVICES FOR MOBILE SOLUTIONS INCLUDE:

- Custom enterprise and mobile application development
- Internationalization of the text throughout the application
- Enterprise application deployments for in-house application delivery
- Deployment of customized applications to the Apple App Store or Android Marketplace
- Application customization to meet an organization's business requirements and branding
- Application support and training
- Integration with other business or mobile applications
