Content Modernization Solutions for Courts

Zia Consulting is focused on content solutions in two key areas: Automation Systems to streamline your document processes--saving time and money across your enterprise; and providing ECM solutions that work the way you do ("Easy ECM")--replacing existing tools, processes, and systems to deliver better content management, control, and collaboration.

Across the country, courts at all levels are working to modernize their document systems and processes, addressing issues ranging from capturing paper-based information, to the launch of e-filing applications, to migration from legacy content management systems.

Some are considering mobile initiatives and others are looking towards cloud technologies; virtually all are looking to save money while at the same time providing better service to judges, administrators, and other users, and also comply with a growing range of "eCourt" mandates.

To address these differing requirements, Zia Consulting provides Content Modernization Solutions focused around two primary areas that deliver measurable results: Document Automation and "Easy ECM" systems that "work the way that you do."

Document Automation Systems

How do courts more efficiently and effectively capture and process documents to save money, provide better service, deliver actionable data metrics, and more? By replacing manual processes and ineffective legacy technologies, Zia's Document Automation Solutions provide measurable benefits across a wide range of use cases including:

- Paperless Document & Records Management utilizing Intelligent Capture

- Electronic Forms (eForms) and Portal Systems for e-Filing

- Secure Electronic Signature with ZSign from Zia

CASE STUDY

Working closely with the CIO's office for a large state courts system, Zia has delivered a content management solution that modernizes their court document application infrastructure.

The solution includes an Alfresco ECM repository integrated with a custom web application for e-Filing, as well as an application for case management.

In addition to new filings, Zia is working with the team to migrate over 25 million existing documents to the new system and providing a distributed backup system.

"We are thrilled to recognize Zia Consulting as the Alfresco Partner of the Year for the extraordinary work they have achieved over the past year through our joint partnership and collaboration.

By expanding our open standards platform to the cloud, Zia Consulting has been able to enhance the solutions they customize and deliver for our customers, putting them back in the content driver's seat."

Martin Musierowicz
VP of Americas, Alfresco

Content Modernization Solutions for Courts

Easy ECM ™ Solutions

How do court IT departments provide users with ECM solutions that work the way they do, using the tools they use today? How do they ensure users aren't forced to use alternatives that don't meet security or reliability needs or fit with court IT strategy? Whether it's replacing email or the shared drive as primary ECM tools, or replacing legacy ECM systems that cost too much and don't work anyway, Zia's Easy ECM solutions deliver the necessary controls, compliance, and collaboration.

Zia Easy ECM Solutions include:

- Case Management
- Contracts Management
- Migration / Consolidation of legacy ECM systems
- Multi-repository solutions
- Microsoft Office integration
- Email Integration for Microsoft Outlook and hosted email

Zia also brings the knowledge, background, and partnerships to address two other primary areas of concern with any government solution: compliance and procurement. We have experience in designing solutions for:

- FISMA Compliance
- Section 508 Compliance
- DoD5015.2 Certification for Records Management

In addition, we understand the government procurement process from RFI to RFP to purchasing via the GSA Advantage program. For that reason, we've created a series of teaming agreements with the GSA contract holders of our leading technology partners so that we can provide authorized GSA quotations directly from Zia in a consolidated manner.

WHY ZIA CONSULTING?

Zia Consulting is an organization of Content People, providing innovative IT Modernization soutions and opening up new possibilities for a truly Content Connected organization. As Content People, we:

- Drive Enterprise Mobility Technology
- Are Experts in Enterprise Integration
- Provide Managed Cloud Solutions

Zia recognizes the importance of content to your success - with a focus on where your content comes from and more importantly where you need it to be. Our solutions from Paper to Mobile are targeted at your specific content needs, from Case Management to Document Capture to Content Migration and more.
