Many successful advisors adopt a "See The People" mantra, but getting out and seeing the people usually means travel — and keeping track of all its related expenses. If filling out reimbursement reports isn't your kind of welcome home party, try Fresh Xpense Capture. The free app allows users to track expenses, take pictures of their

receipts and send all the info to their Xpenser accounts. [Bare bones Xpenser accounts are free; more robust options cost about \$9 a month, per user.] From there, the recorded meals, mileage and other expenses can be organized, exported and reported, no Xeroxing of wrinkly receipts needed.
