

Easy ECM™ Solutions Content Management that Works the Way You Do

The legacy of Enterprise Content Management (ECM) systems is one of complexity, both for implementers and users alike, which is why for most organizations email applications and shared drives are still the dominant form of “content management” and why many ECM technologies are best known as “shelfware”. But there is an alternative, offering users a content management system that works the way they do today without the need for changes in business process or the use of multiple disparate applications to solve business problems.

Zia provides users with Easy ECM Solutions that “work the way they do, using the tools they use today,” so users aren’t forced to use alternatives that don’t fit your Enterprise IT strategy. Our Easy ECM Solutions leverage tools like Office Integration and Cloud Sync to deliver content management systems that work—and since they are built on a single Content Hub, information is available where you need it, when you need it.

PRINCIPLES of EASY ECM SOLUTIONS INCLUDE:

- Automated rule/behavior-based document routing
- Classification and Extraction of documents within the business process
- ECM Anywhere with Cloud Sync, Desktop Sync, and Secure External Collaboration
- Case Management with Alfresco Workdesk
- Microsoft Office Integration for Microsoft Outlook and hosted email
- Application Integration to ERP, CRM, and more
- Available Anywhere with On-Premise, Cloud, and Hybrid
- Available on Anything with Alfresco Mobile and Mobile Workdesk
