Fresh Project lets users track, organize and manage project activities while providing one central location to manage a company's intellectual assets. The solution includes social collaboration tools with project wiki's, blogs and dashlets that display what team members are working on and contributing to. As a result, team members can easily find relevant content, experts, look at past or similar projects and keep on top of any relevant changes.

The Technology:

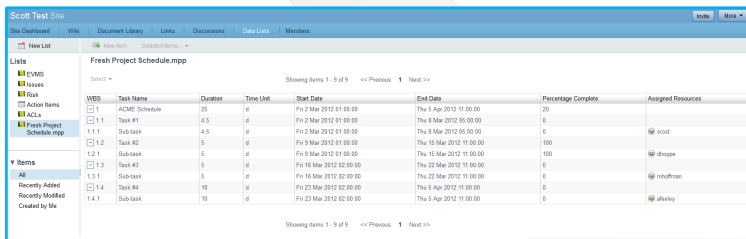

Fresh Project uses project management best practices and open source Alfresco Enterprise Content Management technology. Leveraging open source technology provides users with more flexibility and the ability to use commodity hardware. With **Fresh Project**, organizations get a highly scalable collaboration, content and document management platform at a fraction of the costs of tradition solutions

Benefits include:

- Low Cost
- Little To No IT Involvement
- Rapid Implementation
- Easy Document Management
- Increased Team Collaboration
- Highly Scalable

Features:

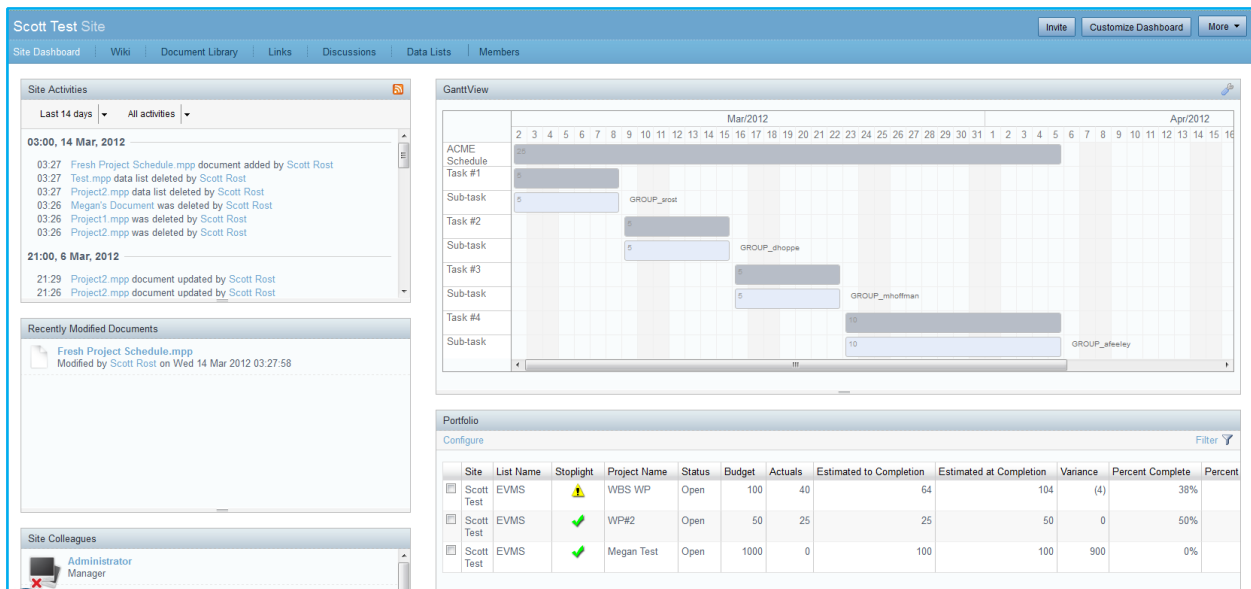

- **Web based** project management environment
- **Centralized content repository** for managing documents with history and version controls
- **Social collaboration** with Wikis, blogs and dashlets
- **Access controls** to folders defined by Manager, Collaborator, Contributor, Consumer and view only
- **Data list tracking** allows for the tracking of items within a project such as action items, issue logs, risk items and change requests
- **Roll up** of any data list in Alfresco with sorting and filtering of data list content
- **Project status** report templates
- **Template process** can be used to create site dashboards, folder structures and to manage ACL's
- **Project Management Institute (PMI)-based** folder structure
